DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 32-34 are rejected under 35 U.S.C. 102(b) as being anticipated by Robinson (3,683,499). Robinson teaches a punch for cutting a hole in a work piece comprising a punch body having an axial bore 35, a first and a second piercing portions 33a and 33b and a first and a second cutting portions 32. See Figs. 1-5.

Allowable Subject Matter

3. Claims 1-31 are allowed.

Claim 1 is allowable for setting forth centering means being longer than cutting means so that centering means enter a pilot hole of the work piece prior to cutting means cutting the work piece.

Claims 18 and 27 are allowable for setting forth a positioning member within an axial bore being longer than piercing means so that the positioning means enter a pilot hole of the work piece prior to piercing means piercing the work piece.

Art Unit: 3724

4. Claims 35 and 36 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Molitor (3,255,526), Herrstrum (3,269,011), Christenson (2,237,069), Jamieson (2,145,725) and Abramson et al. (1,817,223) teach knockout punch of general interest.
